Index to
JOURNAL OF HEAT TRANSFER

Volume 83, 1961

The Journal of Heat Transfer for 1961 was issued quarterly in February, May, August, and November.

Issue	Page Numbers
February	1–104
May	105–232
August	233–390
November	391–517

A

Ablation. *See also* Heat Transfer
Experimental ablation rates in a turbulent boundary layer 457

Acoustics
Influence of sound on free convection from a horizontal cylinder 133
Musical heat exchange 385

Adelberg, Marvin
Experimental study of boiling in reduced and zero gravity fields (D) 251

Allingham, William D.
Determination of boiling film coefficient for a heated horizontal tube in water-saturated wick material 71

Alloys
Thermal conductivity of some commercial iron-nickel alloys 403

Anderson, A. D.
Unsteady laminar free convection 473

Anderson, J. T.
Comparison of the implicit and explicit methods for difference heat-transfer calculations 516

Arnold, E. L.
Axial temperature distribution for a nuclear reactor with sinusoidal space and exponential time-varying power generation 423

Arpaci, V. S.
Dynamic response of heat exchangers having internal heat sources—Part IV 321

B

Baker, Donald R.
Comprehensive approach to the analysis to cooling tower performance 339

Bartlett, E. P.
Experimental ablation rates in a turbulent boundary layer 457

Berenson, P. J.
Film-boiling heat transfer from a horizontal surface 351

Bershader, Daniel
Film boiling in a forced-convection boundary-layer flow (D) 375

Bevans, J. T.
Radiant heat-transfer analysis of a furnace or other combustion enclosure 226

Birkebak, R. C.
Velocity distributions, temperature distributions, effectiveness and heat transfer for air injected through a tangential slot into a turbulent boundary layer 293

Boiling
Determination of boiling film coefficient for a heated horizontal tube in water-saturated wick material 71
Experimental study of boiling in reduced and zero gravity fields 243
Film-boiling heat transfer from a horizontal surface 351
Film boiling in a forced-convection boundary-layer flow 370
Measured variations in local surface temperatures in pool boiling of water ... 254
Natural-circulation tests with water at 800 to 2000 psia under nonboiling, local boiling, and bulk boiling conditions 261
Pool boiling in an accelerating system 233
Subcooled forced-convection film boiling on a flat plate 377

Bonilla, Charles F.
Thermal conductivity and Prandtl number of carbon dioxide and carbon-dioxide air mixtures at one atmosphere (D) 131
Viscosity of steam and water at moderate pressures and temperatures (D) 122

Botje, J. M.
Comparison of the implicit and explicit methods for finite difference heat-transfer calculations 516

Boundary Layer. *See also* Ablation, Condensation
Buoyancy effects in forced laminar convection flow over a horizontal flat plate 479

Boundary Layer (*continued*)
Film boiling in a forced-convection boundary-layer flow 370
Integral treatment of two-phase boundary layer in film condensation 359
Unsteady laminar free convection 473
Velocity distributions, temperature distributions, effectiveness and heat transfer for air injected through a tangential slot into a turbulent boundary layer 293

Brogan, J. J.
Heat conduction in a series composite wall 506

Brown, R. A. S.
Two-phase slug flow (D) 318

Bubbles. *See* Glow of Fluids, Pipe and Piping

Burggraf, F.
Film cooling with multiple slots and louvers
Part 1. Multiple continuous slots 281
Part 2. Multiple rows of discrete louvers 286

Burnett, D. R.
Transient temperature measurement errors in heated slabs for thermocouples located at the insulated surface 505

Burnout. *See* Heat Transfer

C

Carlson, L. W.
Fully developed pressure drop in triangular shaped ducts 441

Carlson, Robert A.
Wall temperature and heat flux measurement in a round tube 105

Casting
Temperature distribution in a slab moving from a chamber at one temperature to a chamber at another temperature 391

Cess, R. D.
Film boiling in a forced-convection boundary-layer flow 370
Free convection with blowing or suction .. 387
Heat transfer to laminar flow across a flat plate with a nonsteady surface temperature 274
Subcooled forced-convection film boiling on a flat plate 377

Chen, Michael Ming
Analytical study of laminar film condensation
Part 1—Flat plates 48
Part 2—Single and multiple horizontal tubes 55

Chin, J. H.
Film cooling with multiple slots and louvers
Part 1. Multiple continuous slots 281
Part 2. Multiple rows of discrete louvers 286
Velocity distributions, temperature distributions, effectiveness and heat transfer for air injected through a tangential slot into a turbulent boundary layer (D) 305

Chung, P. M.
Unsteady laminar free convection 473

Clark, J. A.
Dynamic response of heat exchangers having internal heat sources—Part IV 321
Pool boiling in an accelerating system 233

Combustion. *See also* Furnaces, Heat Transfer
Experimental ablation rates in a turbulent boundary layer 457

Computers. *See* Steam

Condensation. *See also* Boundary Layer
Analytical study of laminar film condensation
Part 1—Flat plates 48
Part 2—Single and multiple horizontal tubes 55
Condensation on a rotating cone 101

Cones. *See* Condensation, Heat Transfer, Mass Transfer

Continuous Casting. *See* Casting

Convection. *See* Heat Transfer

Cooling Systems
Determination of boiling film coefficient for a heated horizontal tube in water-saturated wick material 71
Film cooling with multiple slots and louvers
Part 1. Multiple continuous slots ... 281
Part 2. Multiple rows of discrete louvers 286
Velocity distributions, temperature distributions, effectiveness and heat transfer for air injected through a tangential slot into a turbulent boundary layer 293

Cooling Towers
Comprehensive approach to the analysis of cooling tower performance 339

Costello, C. P.
Experimental study of boiling in reduced and zero gravity fields (D) 252

Cowley, P. E. A.
Dynamic response of heat exchangers having internal heat sources—Part IV (D) 336

Cylinders. *See* Heat-Exchange Equipment, Heat Transfer, Mass Transfer

Cypers, J. A.
Heat transfer and pressure drop in an annular gap with surface spoilers 189

D

Deissler, R. G.
Effect of density variation on heat transfer in the critical region (D) 181

Deland, E. C.
Influence of Prandtl number on the heat transfer from rotating nonisothermal disks and cones 95

Denison, M. R.
Experimental ablation rates in a turbulent boundary layer 457

Disks. *See* Heat Transfer

Doggett, W. O.
Axial temperature distribution for a nuclear reactor with sinusoidal space and exponential time-varying power generation 423

Drake, Robert M., Jr.
Forced convection heat transfer from an isothermal sphere to water (D) 170

Ducts. *See also* Fluid Friction
Fully developed pressure drop in triangular shaped ducts 441
Unsteady laminar flow in a duct with unsteady heat addition 432

Dusinberre, G. M.
Note on the "implicit" method for finite-difference heat-transfer calculations 94
Temperature distribution in a slab moving from a chamber at one temperature to a chamber at another temperature (D) 402

E

Eckert, E. R. G.
Velocity distributions, temperature distributions, effectiveness and heat transfer for air injected through a tangential slot into a turbulent boundary layer 293

Eichhorn, R.
Flow visualization and velocity measurement in natural convection with the

(D) denotes Discussion of a paper.

EICHHORN (*continued*)
tellurium dye method 379
Wall temperature and heat flux measurement in a round tube (D) 109

ELECTRIC ANALOGY
Truncation error estimates for numerical and analog solutions of the heat-conduction equation 382

EL-SADEN, M. R.
Heat conduction in an eccentrically hollow, infinitely long cylinder with internal heat generation 510

F

FAND, R. M.
Influence of sound on free convection from a horizontal cylinder 133

FAUSKE, H.
Burnout in turbulent flow—a droplet diffusion model (D) 162
Model for correlating two-phase, steam-water, burnout heat-transfer fluxes 149

FILMS. *See* BOILING, BOUNDARY LAYER, CONDENSATION, COOLING SYSTEMS

FIRE PREVENTION. *See* HEAT TRANSFER

FIRSTENBERG, H.
Burnout in turbulent flow—a droplet diffusion model 158
Model for correlating two-phase, steam-water burnout heat-transfer fluxes (D) 157

FLOW OF FLUIDS. *See also* BOUNDARY LAYER, CYLINDERS, FLUID FRICTION, HEAT TRANSFER, MASS TRANSFER
Effect of a longitudinal magnetic field on pipe flow of mercury 445
Exact solution of the compressible-flow characteristics in constant-area passages with simultaneous friction and constant heat flux 454
Flow visualization and velocity measurement in natural convection with the tellurium dye method 379
Fully developed pressure drop in triangular shaped ducts 441
Oscillations in two-phase flow systems ... 363
Some temperature and pressure measurements in confined vortex field 33
Two-phase frictional pressure drop prediction from Levy's momentum model ... 503
Two-phase slug flow 307

FLUID FRICTION
Effect of a longitudinal magnetic field on pipe flow of mercury 445
Frictional pressure drop in noncircular ducts 384
Influence of bypass channels on the laminar flow heat-transfer and fluid friction characteristics of shell and tube heat exchangers 39

FLUID-SOLIDS MIXTURES. *See* HEAT TRANSFER

FORSTER, KURT
Experimental study of boiling in reduced and zero gravity fields (D) 251

FREED, N. H.
Truncation error estimates for numerical and analog solutions of the heat-conduction equation 382

FREQUENCY RESPONSE
Dynamic response of heat exchangers having internal heat sources—Part IV 321

FRICTION. *See* FLUID FRICTION

FURNACES
Radiant heat-transfer analysis of a furnace or other combustion enclosure 226

G

GASES. *See also* NITROGEN
Thermal conductivity and Prandtl number of carbon dioxide and carbon-dioxide air mixtures at one atmosphere 125

GEBHART, B.
Transient natural convection from vertical elements 61

GLOBE, SAMUEL
Effect of a longitudinal magnetic field on pipe flow of mercury 445

GOGLIA, GENNARO L.
Experimental determination of limit of supersaturation of nitrogen vapor expanding in a nozzle 27

GOLDMANN, K.
Burnout in turbulent flow—a droplet diffusion model 158
Effect of density variation on heat transfer in the critical region (D) 182
Model for correlating two-phase, steam-water, burnout heat-transfer fluxes (D) 157

GOODMAN, THEODORE R.
Heat-balance integral—further considerations and refinements 83

GOVIER, G. W.
Two-phase slug flow (D) 318

GRAPHITE
Experimental ablation rates in a turbulent boundary layer 457

GRAVITY. *See* BOILING

GREGG, J. L.
Analysis, results, and interpretation for radiation between some simply-arranged gray surfaces 207
Radiant interchange between circular disks having arbitrarily different temperatures 494

GRIFFITH, PETER
Two-phase slug flow 307

GROSH, R. J.
Smoothed pressure-volume-temperature data for water in the critical region derived from experimental measurements 14
Survey of P-V-T data for water in the critical region 1
Transient temperature in a melting solid 409

H

HAPPEL, JOHN
Heat transfer to longitudinal laminar flow between cylinders (D) 422

HARTNETT, J. P.
Condensation on a rotating cone 101
Effect of aspect ratio and tube orientation on free convection heat transfer to water and mercury in enclosed circular tubes 87
Influence of Prandtl number on the heat transfer from rotating nonisothermal disks and cones 95
Velocity distributions, temperature distributions, effectiveness and heat transfer for air injected through a tangential slot into a turbulent boundary layer 203

HAYES, L. E.
Film cooling with multiple slots and louvers
Part 1. Multiple continuous slots 281
Part 2. Multiple rows of discrete louvers 286

HEASLEY, J. H.
Oscillations in two-phase flow systems 363

HEAT-EXCHANGE EQUIPMENT
Determination of boiling film coefficient for a heated horizontal tube in water-saturated wick material 71
Dynamic response of heat exchangers having internal heat sources—Part IV 321
Heat transfer to longitudinal laminar flow between cylinders 415
Influence of bypass channels on the laminar flow heat-transfer and fluid friction characteristics of shell and tube heat exchangers 39
Musical heat exchanger 385

HEAT TRANSFER. *See also* ABLATION, COOLING SYSTEMS, INSTRUMENTS—TEMPERATURE, POWER PLANTS—NUCLEAR
Analysis, results, and interpretation for radiation between some simply-arranged gray surfaces 207
Analytical study of laminar film condensation
Part 1—Flat plates 48
Part 2—Single and multiple horizontal tubes 55
Buoyancy effects in forced laminar convection flow over a horizontal flat plate 479
Burnout in turbulent flow—a droplet diffusion model 158
Comparison of the implicit and explicit methods for finite difference heat-transfer calculations 516
Effect of aspect radio and tube orientation on free convection heat transfer to water and mercury in enclosed circular tubes 87
Effect of density variation on heat transfer in the critical region 176
Experimental study of boiling in reduced and zero gravity fields 243
Film-boiling heat transfer from a horizontal surface 351
Film boiling in a forced-convection boundary-layer flow 370
Forced convection heat transfer from an isothermal sphere to water 163
Free convection with blowing or suction .. 387
Fully integrated solution of the problem of laminar or turbulent flow in a tube with arbitrary wall heat flux 96
Heat-balance integral—further considerations and refinements 83
Heat conduction in a series composite wall 506
Heat conduction in an eccentrically hollow, infinitely long cylinder with internal heat generation 510
Heat conduction through walls during fire 508
Heat transfer and pressure drop in an annular gap with surface spoilers 189

HEAT TRANSFER (*continued*)
Heat transfer by a turbulently flowing fluid-solids mixture in a pipe 183
Heat transfer to laminar flow across a flat plate with a nonsteady surface temperature 274
Heat transfer to longitudinal laminar flow between cylinders 415
Influence of bypass channels on the laminar flow heat-transfer and fluid friction characteristics of shell and tube heat exchangers 39
Influence of Prandtl number on the heat transfer from rotating nonisothermal disks and cones 95
Influence of sound on free convection from a horizontal cylinder 133
Integral treatment of two-phase boundary layer in film condensation 359
Leveque solution with a finite wall resistance 98
Measured variations in local surface temperatures in pool boiling of water ... 254
Model for correlating two-phase, steam-water, burnout heat-transfer fluxes 149
Natural-circulation tests with water at 800 to 2000 psia under nonboiling, local boiling, and bulk boiling conditions 261
Note on the "implicit" method for finite-difference heat-transfer calculations 94
On Jenkins model of eddy diffusivities for momentum and heat 389
On some analytic solutions of steady heat conduction in composite slabs of various cross sections 512
On some laminar forced-convection problems 466
Pool boiling in an accelerating system 233
Radiant heat-transfer analysis of a furnace or other combustion enclosure 226
Radiant interchange between circular disks having arbitrarily different temperatures 494
Radiation heat transfer in a spherical enclosure containing a participating, heat-generating gas 199
Radiative transport within an ablating body 215
Refrigerator heat leak in sandwiched thermoelectric elements 102
Some temperature and pressure measurements in confined vortex fields 33
Tables of $\mathrm{Cosh}\,(1+i)X$, $\dfrac{\mathrm{Sinh}\,(1+i)X}{(1+i)X}$, and $(1+i)X\,\mathrm{Sinh}\,(1+i)X$ for periodic heat conduction calculations 514
Temperature distribution in a slab moving from a chamber at one temperature to a chamber at another temperature 391
Thermal conductivity and Prandtl number of carbon dioxide and carbon-dioxide air mixtures at one atmosphere 125
Thermal conductivity of some commercial iron-nickel alloys 403
Transient natural convection from vertical elements 61
Transient temperature in a melting solid 409
Transition on a heated horizontal rotating cylinder 386
Truncation error estimates for numerical and analog solutions of the heat-conduction equation 382
Unsteady laminar flow in a duct with unsteady heat addition 432
Unsteady laminar free convection 473
Velocity distributions, temperature distributions, effectiveness and heat transfer for air injected through a tangential slot into a turbulent boundary layer 203

HEIKES, R. R.
Optimization of a sandwiched thermoelectric device 77

HODGE, R. I.
Frictional pressure drop in noncircular ducts 384

HORVAY, G.
Temperature distribution in a slab moving from a chamber at one temperature to a chamber at another temperature 391

HOUGEN, JOEL O.
Dynamic response of heat exchangers having internal heat sources—Part IV (D) 336

HSU, S. T.
Measured variations in local surface temperatures in pool boiling of water ... 254

HSU, YIH-YUN
Effect of density variation on heat transfer in the critical region 176
Film-boiling heat transfer from a horizontal surface (D) 356

HUBBARD, H. A.
Heat transfer to longitudinal laminar flow between cylinders 415
Radiation heat transfer in a spherical enclosure containing a participating, heat-generating gas 199

I

INSTRUMENTS. *See also* VISCOMETERS

(D) denotes Discussion of a paper.

INSTRUMENTS—TEMPERATURE
Transient temperature measurement errors in heated slabs for thermocouples located at the insulated surface 505
Wall temperature and heat flux measurement in a round tube 105
IRVINE, T. F., JR.
Fully developed pressure drop in triangular shaped ducts 441
Thermal conductivity and Prandtl number of carbon dioxide and carbon-dioxide air mixtures at one atmosphere 125
ISBIN, H. S.
Burnout in turbulent flow—a droplet diffusion model (D) 162
Model for correlating two-phase, steam-water, burnout heat-transfer fluxes 149
Natural-circulation tests with water at 800 to 2000 psia under nonboiling local boiling, and bulk boiling conditions (D) 273

K

KADANOFF, LEO P.
Radiative transport within an ablating body 215
KAYE, J.
Influence of sound on free convection from horizontal cylinder 133
KEMENY, G. A.
Heat transfer and pressure drop in an annular gap with surface spoilers 189
KESTIN, J.
Forced convection heat transfer from an isothermal sphere to water (D) 172
Influence of sound on free convection from a horizontal cylinder (D) 143
Viscosity of steam and water at moderate pressures and temperatures (D) 122
KNOERNSCHILD, E. M.
Some temperature and pressure measurements in confined vortex fields (D) 37
KNUDSEN, JAMES G.
Local mass transfer from circular cylinders in cross flow (D) 492
KOPPEL, W. K.
Comparison of the implicit and explicit methods for finite difference heat-transfer calculations 516
KOH, J. C. Y.
Integral treatment of two-phase boundary layer in film condensation 359
KREITH, FRANK
Heat transfer and pressure drop in an annular gap with surface spoilers (D) 197

L

LARSEN, FLOYD W.
Effect of aspect ratio and tube orientation on free convection heat transfer to water and mecury in enclosed circular tubes 87
LAY, J. E.
Some temperature and pressure measurements in confined vortex fields (D) 37
LEMLICH, ROBERT
Musical heat exchanger 385
LEPPERT, G.
Forced convection heat transfer from an isothermal sphere to water 163
LICHTENSTEIN, J.
Comprehensive approach to the analysis of cooling tower performance (D) 349
LILEY, P. E.
Smoothed pressure-volume-temperature data for water in the critical region derived from experimental measurements 14
Survey of P-V-T data for water in the critical region 1
Thermal conductivity and Prandtl number of carbon dioxide and carbon-dioxide air mixtures at one atmosphere (D) 131
LOEFFLER, A. L., JR.
Heat transfer to longitudinal laminar flow between cylinders 415
LOMBARDI, C.
Burnout in turbulent flow—a droplet diffusion model 158
Model for correlating two-phase, steam-water, burnout heat-transfer fluxes (D) 157
LU, PAU-CHANG
On some analytic solutions of steady heat conduction in composite slabs of various cross sections 512

M

MCELROY, D. L.
Thermal conductivity of some commercial iron-nickel alloys (D) 407
MCENTIRE, JACK A.
Determination of boiling film coefficient for a heated horizontal tube in water-saturated wick material 71
MAGNETISM
Effect of a longitudinal magnetic field on pipe flow of mercury 445
MANOR, P.
Analysis, results, and interpretation for radiation between some simply arranged gray surfaces 207
MARCHATERRE, J. F.
Two-phase frictional pressure drop prediction from Levy's momentum model 503
MARTIN, T. W.
Improved computer oriented methods for calculation of steam properties 515
MASS TRANSFER
Burnout in turbulent flow—a droplet diffusion model 158
Local mass transfer from circular cylinders in cross flow 483
Mass transfer in laminar flow about a rotating cone 514
Model for correlating two-phase, steam-water, burnout heat-transfer fluxes 149
MATHEMATICS
Comparison of the implicit and explicit methods for finite difference heat-transfer calculations 516
Heat-balance integral—further considerations and refinements 83
Integral treatment of two-phase boundary layer in film condensation 359
Leveque solution with a finite wall resistance 98
Note on the "implicit" method for finite-difference heat-transfer calculations 94
On some analytic solutions of steady heat conduction in composite slabs of various cross sections 512
Tables of Cosh $(1 + i)X$, $\frac{\text{Sinh } (1 \times i)X}{(1 + i)X}$, and $(1 + i)X$ Sinh $(1 + i)X$ for periodic heat conduction calculations 514
Truncation error estimates for numerical and analog solutions of the heat-conduction equation 282
MATRIX TABLES. *See* MATHEMATICS
MELTING
Transient temperature in a melting solid 409
MENDLER, O. J.
Natural-circulation tests with water at 800 to 2000 psia under nonboiling, local boiling, and bulk boiling conditions 261
MERCURY. *See* FLOW OF FLUIDS, HEAT TRANSFER
MERTE, HERMAN, JR.
Pool boiling in an accelerating system 233
METAL ROLLING
Temperature distribution in a slab moving from a chamber at one temperature to a chamber at another temperature 391
MORGAN, A. I., JR.
Wall temperature and heat flux measurement in a round tube 105
MORI, YASUO
Buoyancy effects in forced laminar convection flow over a horizontal flat plate 479
MOSZYNSKI, J. R.
Viscosity of steam and water at moderate pressures and temperatures 111

N

NICKEL. *See* ALLOYS
NITROGEN
Experimental determination of limit of supersaturation of nitrogen vapor expanding in a nozzle 27
NORRIS, R. W.
Comprehensive approach to the analysis of cooling tower performance (D) 349
NOVOTNY, JEROME L.
Thermal conductivity and Prandtl number of carbon dioxide and carbon-dioxide air mixtures at one atmosphere 125
NOWAK, E. S.
Smoothed pressure-volume-temperature data for water in the critical region derived from experimental measurements 14
Survey of P-V-T data for water in the critical region 1
NOYES, R. N.
Exact solution of the compressible-flow characteristics in constant-area passages with simultaneous friction and constant heat flux 454
Fully integrated solution of the problem of laminar or turbulent flow in a tube with arbitrary wall heat flux 96

Dynamic response of heat exchangers having internal heat sources—Part IV (D) 336

USIBKIN, C. M.
Experimental study of boiling in reduced and zero gravity fields 243
Radiation heat transfer in a spherical enclosure containing a participating, heat-generating gas 199

V

VANDERWATER, R.
Model for correlating two-phase, steam-water, burnout heat-transfer fluxes 149

VAN HUFF, N. E.
Natural-circulation tests with water at 800 to 2000 psia under nonboiling, local boiling, and bulk boiling conditions 261

VAN WYLEN, GORDON J.
Experimental determination of limit of supersaturation of nitrogen vapor expanding in a nozzle 27

VIBRATION
Oscillations in two-phase flow systems 363

VISCOMETERS
Viscosity of steam and water at moderate pressures and temperatures 111

VISKANTA, R.
Radiation heat transfer in a spherical enclosure containing a participating, heat-generating gas (D) 206
Radiative transport within an ablating body (D) 225

VLIET, G. C.
Forced convection heat transfer from an isothermal sphere to water 163

W

WALLIS, G. B.
Oscillations in two-phase flow systems 363
Two-phase slug flow 307

WALLS. *See* HEAT TRANSFER

WATER
Smoothed pressure-volume-temperature data for water in the critical region derived from experimental measurements 14
Survey of P-V-T data for water in the critical region 1
Viscosity of steam and water at moderate pressures and temperatures 111

WATSON, T. W.
Thermal conductivity of some commercial iron-nickel alloys 403

WEISS, A.
Natural-circulation tests with water at 800 to 2000 psia under nonboiling, local boiling, and bulk boiling conditions 261

WESTWATER, J. W.
Determination of boiling film coefficient for a heated horizontal tube in water-saturated wick material (D) 76

Y

YANG, K. T.
Heat-balance integral—further considerations and refinements (D) 85

YANG, W. J.
Dynamic response of heat exchangers having internal heat sources—Part IV 321

YELLOTT, JOHN I.
Experimental determination of limit of supersaturation of nitrogen vapor expanding in a nozzle (D) 32

Z

ZUBER, NOVAK
Film-boiling heat transfer from a horizontal surface (D) 357
